**Attachments:** 2006 Pool Cars Maintenance Costs.pdf; Fleet Manager Report.pdf; 2011 Pool Cars Maintenance Costs.pdf; 2012 Take Home Vehicles Maintenance Costs.pdf; take home cars.pptx

Councilman Nasser,

Attached you will find the information you requested. I apologize for the length of time it has taken, but it was not always easy to get a response from some of the agencies. Within the "take home cars" list you will see that all of the agencies that responded have a take-home car program. Captain Loudermilk was able to determine that some were more restrictive than others, but all permitted use of the vehicle at one year or less. In comparison, our five year requirement is the most restrictive of all of the cities who responded. Bloomington limited their take-home cars to upper level staff and Muncie to SWAT, detectives, and supervisors, but the rest appeared available to patrol officers by their first year. Additionally, all fuel is dispersed using issued cards that prohibit patrol officers from exceeding 30 gallons per week and 15 gallons for detectives and support staff. Essentially, any gas beyond what is estimated for normal work use is paid for by the officers.

Additionally, you will find a report from our fleet manager regarding the program and costs. Attached are maintenance costs for the 2006 and 2011 pool cars, and the 2012 take-home cars. You will notice that a pool car costs the department thousands more per vehicle over the first four years compared to nearly no cost for a take-home car. The wear and tear of multiple drivers is significant and the warranties are gone in roughly 18 months causing the costs to rise. In comparison, take-home cars typically get the full 36 months from the warranty and are better maintained. You will find the cost break-down and specific work completed on each car attached.

As I previously stated, I feel that this program provides a significant benefit to public safety in terms of an increased presence and deterrence. It has been nearly 20 years since we began this program, and many people may not realize how often the patrol car they pass is not an on-duty officer. This is true of criminals as well. All officers are required to have their firearm, radio, and fully-marked police jacket inside the vehicle whenever they are driving a police vehicle. This provides 4 to 5 times the number of eyes and ears on city streets during the evening and overnight hours. Even when driving their take-home cars to a store or gym, off-duty officers constitute an entire division of officers capable of responding or assisting on-duty officers at no additional salary or overtime cost to the city. Not only have off-duty officers been the first on scene to many serious crimes, they also represent an essential component of our response to an active shooter event. Our active shooter training with the other law enforcement entities in Vigo County depends heavily on the nearest on-duty and off-duty officers ability to immediately respond. An active shooter event, especially one in a school or large factory, requires a response from as many officer as possible as quickly as possible. Having a take-home car program is essential to the modern needs of law enforcement.

I hope this information is helpful and please let me know if there is anything else you need.

**Shawn Keen**

**TERRE HAUTE POLICE DEPARTMENT**

**FLEET MANAGEMENT UNIT**

**TAKE HOME CAR PROGRAM**

Sgt. James L. Schneider

Fleet Manager

812-244-2216

[Jim.schneider@terrehaute.in.gov](mailto:Jim.schneider@terrehaute.in.gov)

The Terre Haute Police Department has had a take home car program in many forms for many years. The latest incarnation of this program was created in late 1999.

The main premise behind a take home car program is to deter crime in the neighborhoods of our community and to provide a larger pool of officers that can be called upon should a major emergency arise. I can cite a few instances where having a large number of take home cars has proven beneficial but no situation sticks out more than the events of September 11, 2001. Our country was under attack and during these attacks; the Vigo County School Corporation had received threats to their schools. Once learning of this, the Chief of the Terre Haute Police Department at the time; James Horrall ordered every officer with a take home car to respond to and secure a school. Within a matter of minutes at least one police car was on scene at every school in the county. I'm sure one can imagine the feeling of security this gave our children and school faculty in that time of uncertainty.

During the past several years, the Terre Haute Police Department has expanded its role as a service agency to our community. Twenty years ago, our transportation needs were simple. We needed a few marked patrol cars for shift work and we needed some cars for the detective division. Very few officers were on call at any given time and specialty units were nonexistent. Times have changed and so has the mission of the department. We now have many specialized units that are often called upon to serve the community. We now have a Special Response Team, A Hostage Negotiation Team, An Incident Response Team, A Fatal Alcohol Crash Team, A K-9 Unit, A Traffic Accident Investigation Unit and a Fleet Services Unit. Each of the officers of these units are highly trained professionals than need specific equipment to perform these additional duty assignments they have volunteered for. This equipment is carried on board with these officers. No member of any of these units receives any additional financial compensation for their membership on these teams. Without the take home car program these officers would spend precious time driving to a motor pool and picking up a vehicle.

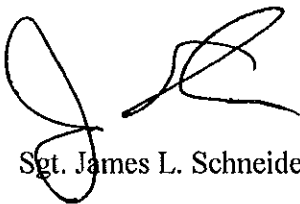

Another advantage of a take home car program is what I like to call pride of ownership. Most officers assigned a take home care will take the extra effort to keep their vehicles clean and in a condition that shows not only pride in our department but pride in our city as well. When a potential business comes to our city I feel that we want them to see a fleet of modern professional looking police cars instead of aged looking cars with hubcaps missing. The department does have policies in place that outline the treatment of equipment but when officers share cars 24/7 it is very difficult to determine who actually damaged a car. With an assigned car this problem is eliminated.

Cost of maintenance with a take home car is lower than with a pool car that is hot seated 24/7. I have provided random samplings of maintenance records for pool cars that were purchased in 2006 and 2011. I have also provided random samplings of take home maintenance records for model year 2012 cars. One huge factor that must be considered where making a comparison between pool cars and take home cars is that of warranty. It has been reported to me that 8-10%

of the cost of a new car is for the warranty coverage. With a pool car, the city never has seen the benefit of the warranty as the mileage demands placed on these cars usually exceeds the warranty mileage limit within eighteen months. With a three year/ thirty-six thousand mile warranty, the city loses fifty percent of this benefit. With take home cars the city has always reaped the benefits of the full warranty and of the 2012 Model cars, each of them fulfilled the warranty period for mileage and simply expired due to the time stipulation. In addition, we estimate the service life of a take home car to be ten years as opposed to five years for a pool car.

When the facts of the take home car program are brought to light, I feel confident that any reasonable person can see the benefit of the continued use of this program. Some may feel that this is just a perk for the officer but it must be noted that all maintenance on a take home car is performed on that officers own time and without compensation. Officers driving take home cars are required to stop and render aid to the public when in that car off duty and officers are given a limited fuel allotment to use. If that amount is exceeded, each officer is required to add fuel at his own expense.

Feel free to contact me if you have any questions on this program.

A handwritten signature in black ink, appearing to read 'Sgt. James L. Schneider', with a large, stylized initial 'S'.

Sgt. James L. Schneider

Fleet Manager
